SKILLS

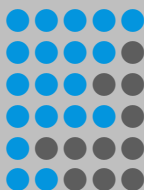

Mathematics

Operations Research
Statistics
Probability
Algebra
Discrete Mathematics
Analysis

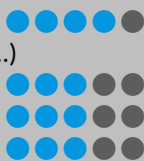

Programming

Python
C
MySQL
Java
Prolog
Haskell

Software & Tools

Scientific Python
(e.g. Pandas, Numpy, scipy, ...)
Cython
L^AT_EX
Git

Languages

Spanish
French
English

SUMMARY

From a young age I was interested in the fields of mathematics and physics. That's why I enrolled in a BSc in Mathematics and Computer Science by the Technical University of Madrid (UPM).

My interests lie in optimization, modelling, cryptography and data science. In general, I'm passionate about fields of computer science where math plays a crucial role.

I've chosen to make a gap year between my bachelor's degree and my master's in order to avoid a rushed decision on my Master selection. Seeking to leverage first-hand experience especially in a foreign country will not only help to improve my languages, increase my maths and IT skills but also will give me a better overview on computer science options to better select my future.

EDUCATION

📅 09/2017 - 6/2021
📍 Technical University of Madrid
240 ECTS
BSc in Maths and Computer Science

📅 2005 - 2017
📍 Lycée Français de Valencia
Scientific Baccalaureate (Spec. Maths)

INTERNATIONAL EXPERIENCE

- Sailing with international regattas
- Language Stages: France, New Zealand

GENERAL SKILLS

Mathematical Rigor

Logical Thinking

Fast Learner

Teamwork

Detail Oriented

Agile Methodologies
